

**THE NATIONALLY RECOGNIZED PENINSULA REGIONAL MEDICAL CENTER** invites you to discover how "Our Experience Makes Your Experience Better."

Experience. In the field of medicine on the Delmarva Peninsula, it has always been essential to successful outcomes and partnerships that have grown strong and continue to shape the future of health care in the region where our 3,300 physicians, nurses, health care professionals and volunteers live and raise their families.

Since 1897, the 358 bed Peninsula Regional Medical Center team has been focused on providing our region with compassionate care, dedicated to the complete satisfaction and safety of our patients and devoted to ensuring that everyone has access to cost-effective, high-quality care.

Medical Center leaders have invested nearly \$150 million dollars in the past decade on state-of-the-art clinical, surgical, medication dispensing, pharmaceutical, diagnostic imaging and information technologies. We were the first facility on the Delmarva Peninsula to offer the daVinci Surgical System robot for prostate and cardiac surgery.

We were among the first 5% of all United States hospitals to pioneer bedside medication scanning for patient safety, installed one of the nation's first automated drug dispensing robots and electronic physician order entry to close the loop on medication and patient safety.

At the Guerrieri Heart and Vascular Institute our open heart surgery team has repaired over 11,000 hearts and performed more than 200,000 other heart procedures since the mid 1970's.

The Richard A. Henson Cancer Institute is home to the region's most comprehensive cancer program featuring a diverse team of surgical specialists and sub-specialists, medical and radiation oncologists.

The region's most experienced health care team also delivers over 2,200 babies, treats over 75,000 patients in the Emergency/Trauma Center, performs more than 500 joint replacements and touches the lives of nearly 500,000 of our friends and neighbors each year through inpatient and outpatient services.

Providing "Exceptional Service Without Exception". That's why you'll always find our health care team at its best during those times you need us most.
