

Current Residents:

Richard Jiang

Pharmacy School: Doctor of Pharmacy from the University of Maryland Eastern Shore

Undergraduate: Bachelor of Biology in Animal Sciences from Towson University

Hometown: Baltimore, MD

Research: Evaluation of de-escalation of empirically initiated broad-spectrum antibiotics in patients diagnosed with HAP

Why PRMC: I chose Peninsula Regional Medical Center (PRMC)'s PGY-1 Pharmacy residency program because of the learning environment that they provide to their residents and students. PRMC pharmacists are not only experts in their respective specialties, but they are also truly committed to bringing out the best in their residents. During my residency search they were the only program to successfully display this to me. I am very pleased with my decision thus far and have no doubt that the team here at PRMC will guide me towards a successful career.

Michael Smith

Pharmacy School: Doctor of Pharmacy from the University of Maryland, Baltimore

Undergraduate: Towson, University

Hometown: Rosedale, Maryland

Research: TBD

Why PRMC: Peninsula Regional Medical Center encourages new ideas and emphasizes communication across all health professions. Pharmacy is relied on heavily by the health care team at PRMC, and the clinical pharmacists play a larger role than in most hospitals. I am able to learn from expert clinicians practicing in areas such as emergency medicine, critical care, and infectious disease. The program is highly flexible and committed to producing quality rotations tailored to their resident's interests. Few residency programs offer the same combination of accessible preceptors, plentiful patient care opportunities, and outstanding work conditions as PRMC.
