

Current Residents:

Scott Baker

Pharmacy School: Doctor of Pharmacy, the University of Maryland Eastern Shore

Undergraduate: Bachelor of Science in Biology, University of Maryland, College Park

Hometown: Snow Hill, MD

Research: Analysis of awareness, appropriateness, and pharmacoeconomic considerations of CIWA-Ar protocol implementation

Why PRMC: As a lifelong resident of the lower Eastern Shore, I have come to appreciate PRMC as the largest, most comprehensive health-system available to my home community. Furthermore, serving here as a student intern during pharmacy school allowed me to build close relationships with patients and staff. I have discovered that PRMC's size, diverse patient population, and experienced pharmacy staff contribute to complex and varied learning opportunities, all while maintaining the feel of a small, close-knit community. Essentially, I chose PRMC because it provides everything needed to have an educational and impactful year as a pharmacy resident.

Jillian Olmstead

Pharmacy School: Doctor of Pharmacy, Thomas Jefferson University College of Pharmacy

Undergraduate: Bachelor of Science in Biochemistry, Ithaca College

Hometown: Magnolia, DE

Research: Delay in second-dose antibiotics for pneumonia and effect on patient outcomes

Why PRMC: I choose PRMC because the residency program offer a variety of rotations which would help me to gain experience in areas of pharmacy that I am not familiar with. PRMC also serves a diverse patient population allowing me to see a large variety of cases. PRMC has multiple teaching and precepting opportunities, which allow me to learn and grow as a pharmacist as well as help the profession of pharmacy advance by educating the next generation of pharmacists. I am also from the Delmarva peninsula, so being able to take care of patients here at PRMC means that I get to give back to the community that raised me which is an incredible feeling.
